

Guardian Program Overview

The goal of Pendleton Labradors has always been to raise healthy, well-tempered, and beautiful Labradors who bring joy, companionship, and love to every home. To do that while ensuring each of our dogs gets the individual attention and family life they deserve, we're introducing our Guardian Home Program.

A Guardian Home allows one of our breeding dogs to live as a cherished family member with you while remaining part of our breeding program. This arrangement benefits both the dog and the family — the dog receives the love, socialization, and comfort of home life, while we are able to maintain the highest standards in responsible, ethical breeding.

How the Guardian Program Works:

- ❖ The initial sale price of a puppy is waived for approved Guardians.
- ❖ The Guardian family provides a permanent, loving home for the dog.
- ❖ Pendleton Labradors retains breeding rights for a set period of time or number of litters.
- ❖ All breeding-related costs (health testing, breeding, whelping, etc.) are covered by us.
- ❖ The Guardian family covers normal day-to-day care — food, training, vet care, and love.
- ❖ Once the breeding career is complete, full ownership of the dog is officially transferred to the Guardian family.

We seek families who see their dogs as true companions and want to be part of something meaningful — helping to continue exceptional Labrador lines known for their temperament, conformation, and health. Guardians become an extension of the Pendleton Labradors family. We stay in close contact, provide ongoing support, and work together to ensure the best care and environment for your Guardian dog.

If you're interested in learning more about our Guardian Program, we'd love to talk with you about the details, expectations, and benefits. This is an opportunity to welcome a top-quality Labrador into your family — and to play a vital role in the future of our breeding program. Together, we can raise and share incredible dogs who bring joy for generations to come.
